

CAPABILITIES PROFILE

Custom Print and Apply Carton & Pail Labeler

PRODUCTION RATE

Up to 25 PPM

APPLICATION

Wraparound
Corner Wrap
Side Panel

INDUSTRY

Automotive/Chemical
Personal Care
Food Processing
Household

PRODUCTS

Five-Gallon Pails
Corrugated Cartons

This custom labeling system features Quadrel's heavy-duty Q33 printer applicator with a leading panel corner wrap assembly and pneumatic controlled roller impresser. This system accommodates labeling of five-gallon pails and corrugated cartons.

The pails are hand-loaded onto the product conveyor, the Q33 prints and applies a label to the side of the pail. The wrap station completes the label wipedown as the product spins.

For the cartons, the Q33 predispenses a label to the leading panel module, the label is applied to the leading panel and the pneumatic roller impresser completes the label wipedown onto the side of the product.

Additional features include a custom width and length stainless steel conveyor, guarding for the wrap station and custom product rails.
