

This custom EAS applicator features a large 20" diameter roll and capacity and high-speed tamp/blow applicator module.

The Q41 EAS is capable of dispensing all Sensormatic (including Ultramax) as well as Checkpoint (R.F) security tags. Changeover is quick and easy between the two most commonly used tags.

An optional wipe-on module can be purchased for inflow labeling.

The Q41 EAS labels at speeds up to 300 ppm while maintaining accuracy and reliable performance.

The microprocessor features 20 label presets, touchpad controls, product and label counters and line speed compensation.
